

Basic Weather Theory

Weather continues to play a role in a disproportionate share of aircraft accidents. When was the last time you reviewed weather theory, discussed weather sources, and considered the role weather plays in a good go/no-go decision? Come learn how to be a safer 'weather' pilot. Our speaker, Byron Danforth, is a FAA Safety Team Representative, CFI, A&P mechanic with Inspection Authorization, aircraft owner, and experienced mountain pilot.

Directions: Enter Brunswick Landing from Bath Rd and follow Admiral Fitch Road to the end. Turn left onto Orion St. Tech Place will be on your right just after the road bends to the right. There will be vehicle parking and aircraft parking. Aircraft parking available on ramp. A short walk from Tech Place.

A message from the National FAASafety Team Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at www.FAASafety.gov!
